Project Title

Converting Real Data into Synthetic Data Using Python Libraries

Project Description

This project focuses on generating **synthetic data** using Python libraries while preserving the characteristics of real-world datasets. Synthetic data is widely used in Artificial Intelligence, Machine Learning, software testing, and research where privacy and data security are important.

In this project, a dataset containing **10,000 synthetic records** was successfully generated. Each record consists of the following attributes:

-  Name

- 🎂 Age
- 🏙️ City

The generated data was created using Python libraries and stored in a database for efficient management and future analysis. This project demonstrates the practical implementation of synthetic data generation techniques while ensuring scalability, consistency, and privacy.

🔧 Python Libraries Used

- 🐍 Python
- 📊 Pandas
- 📦 NumPy
- 🗄️ SQLite
- 🎯 Random
- 📓 Jupyter Notebook

🎯 Project Outcome

✓ Generated **10,000 realistic synthetic records** successfully.

- ✓ Stored the generated data into a database for efficient retrieval.
- ✓ Learned the practical implementation of Python libraries for synthetic data generation.
- ✓ Improved knowledge of data privacy, database management, and AI data preprocessing techniques.

SQL [Structured Query Language]

- programming language
- Manage and Manipulate Relational Databases
- perform operations like: querying, updating and...

sql types:

- MySQL
- PostgreSQL
- SQLite
- Microsoft SQL Server
- Oracle

SQLite:

```
In [1]: import sqlite3 as sql  
import pandas as pd
```

```
In [2]: # connect to a database [Create if it doesnot exists]
        connection = sql.connect('students2.db')
```

```
In [3]: # creating a cursor object using the connection
        cursor= connection.cursor()
        # cursor helps you to traverse over the records in a db
```

```
In [ ]: cursor.execute('''
        CREATE TABLE STUDENT(
            id INTEGER PRIMARY KEY,
            name TEXT NOT NULL,
            age INTEGER,
            city TEXT
        )''')
